FAST RESPONSE

FOR COVERS AND GROUND SHEETS

Polytex, a major supplier of tarpaulin grain covers for the grain handling industry, is equipped to respond quickly to the demand for bunker covers from grain dealers and grain farmers alike, with the capacity to produce large numbers of grain storage covers promptly as well as arrange for quick transportation to various locations.

Growers can avoid receipt delays and have greater control over their investment in the harvest with on-farm storage. Polytex produces cost effective bunker covers using fabric from the same source used by major storage facilities.

**QUALITY
GUARANTEE**

Quality Guarantee

You can be sure your investment will last and stand up to the conditions because Quality is Paramount and we will stand by our product. Polytex expertise rests in Tarpaulin Manufacturing.

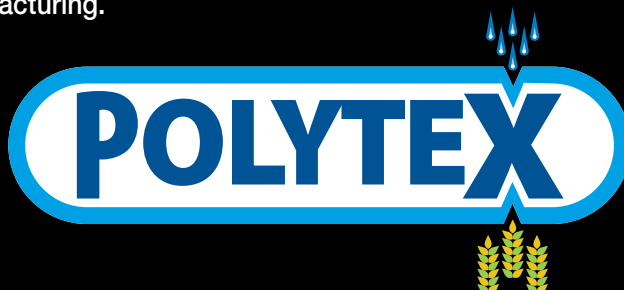

Australia Wide Delivery

Ask your Polytex account manager to assist and provide Australia Wide Freight Solutions using a vast network of recommended and competent carriers.

Australian Manufacture

Polytex encompasses 2500m² of manufacturing facilities and provides employment opportunities in the heart of NSW. Products are manufactured to industry standards to suit harsh and inclement Australian climates.

PROTECTS ... rain or shine

POLYTAC

FABRIC SEALANT TAPE

POLYTAC is a reliable, long-lasting adhesive tape and sealant that has excellent tack, tensile strength and water resistance that you can trust for the most critical areas of application.

“POLYTAC” is moisture and vapor resistant, non-toxic, non-corrosive and is resistant to a wide range of chemicals and gases.

Its UV and age resistance, coupled with excellent temperature tolerance (-30°C to 120°C) make POLYTAC uniquely suited to a wide range of applications and conditions.

USES

AGRICULTURE

Used for sealing, joining or repairing polyethylene tarpaulin or sheeting in dam liners, grain bunkers, cotton module covers. It is also used for sealing water tanks, silos and geo textiles.
